Our Mission

Saving lives by training skilled birth attendants

1. Access to skilled birth attendant before, during and after childbirth saves the lives of women and infants, and ensures a good start in life.

2. We train and empower skilled birth attendants to provide culturally appropriate health interventions.

3. We work alongside the Haitian Ministry of Health and local community leaders. Our programs are led by and for Haitians.

75% of women in rural Haiti don’t have access to a skilled birth attendant.

20% percent of all skilled birth providers in Haiti are trained by MFH.
